

# Avoid Eye Strain and Back Pain with Precision Surgical Loupes

*We do a better job when we can clearly see the details of the task at hand. Unfortunately, when working with small objects we tend to bend over in unnatural positions for extended periods of time. This can result in eye strain and back pain that can have long-term, detrimental consequences to our overall health and well-being.*

*Using surgical loupes quickly improves vision and corrects poor posture.*

## **Improved Vision**

With 2.5 or 4 times magnification you will be able to see intricate details of your work area more clearly and perform the most delicate of surgical work on the smallest possible scale.

## **Reduced Eye, Neck, and Back Fatigue**

You will no longer need to bend forward to get closer to your work area in order to see better.

## **Freedom of Movement**

Unlike microscopes, loupes move with your head so there is no need to hold your head steady to look into an eye piece.

The work area can be easily repositioned when using loupes. With a microscope, your work area is fixed directly under the objectives.

## **Protection**

Glasses and side protectors offer protection for the eyes from contaminating splashes or debris.

## **Easy Adjustment**

A double-hinge, flip-up design provides superior optical alignment and ease of transition between magnified and normal field of vision.

## **Your Benefits**

- ▣ *Improved Vision*
- ▣ *Less Fatigue*
- ▣ *Freedom of Movement*
- ▣ *Eye Protection*
- ▣ *Easy Adjustment*

## Available Products

Item Number	Description	Magnification	Working Distance	Price
RS-6690	Clip-on loupes (glasses not included) Double hinge, flip-up design	2.5 x	340 mm	\$295.00
RS-6691	Wire frame without glasses Single hinge, angle adjustment	2.5 x	340 mm	\$335.00
RS-6692	Wire frame with glasses Double hinge, flip-up design	2.5 x	340 mm	\$370.00
RS-6693	Wire frame with glasses Double hinge, flip-up design	2.5 x	420 mm	\$370.00
RS-6694	Wire frame with glasses Double hinge, flip-up design	4.0 x	340 mm	\$475.00
